

1st TechTIDE User Workshop

15th May 2019

Venue: German Aerospace Center, DLR, Neustrelitz, Germany

[HTTP://TECH-TIDE.EU](http://tech-tide.eu)

TechTIDE is a project in the European Union Horizon 2020 COMPET-Space Weather Call 2017.

The overarching objective of TechTIDE is to design and test new viable Travelling Ionosphere Disturbances (TID) impact mitigation strategies for the technologies affected. Close collaboration with operators of these technologies is implemented to demonstrate the added value of the proposed mitigation techniques.

1st TechTIDE User Workshop

15 May 2019

The 1st TechTIDE user workshop shall bring together users and developers of the TID monitoring and warnings. The first release of the TechTIDE system will be demonstrated. Users are invited to present their applications and explain the impact and mitigation of TID effects in their systems. Following user contributions addressing ionosphere impact are anticipated:

- RTK services
- Radio astronomy
- Radio communication and geolocation applications
- GBAS & SBAS applications

Registration on
